

Painting divider

DESIGN BY ALESSANDRA BALDERESCHI

D^ECASTELLI

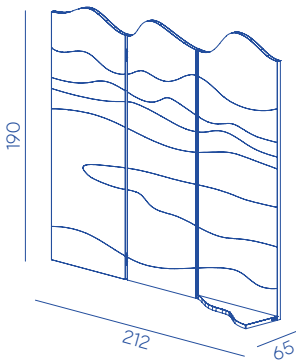

Painting

DESIGN BY ALESSANDRA BALDERESCHI

Self-standing room divider clad on both sides with different metals and finishes.

Divisorio self-standing rivestito su entrambi i lati con metalli e finiture diverse.

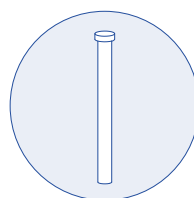

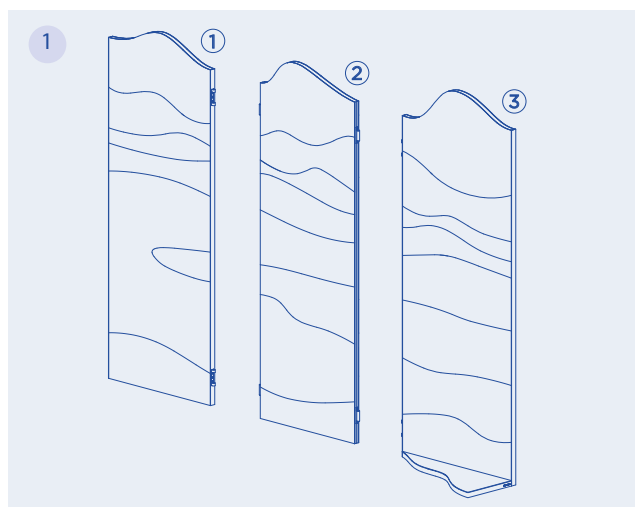

Painting

Tools for a correct assembly: Rubber mallet (or other striking tools that will not damage the metal surface).

Strumenti per un corretto montaggio: Martello di gomma (o altri arnesi a percussione che non vadano a rovinare la superficie in metallo)

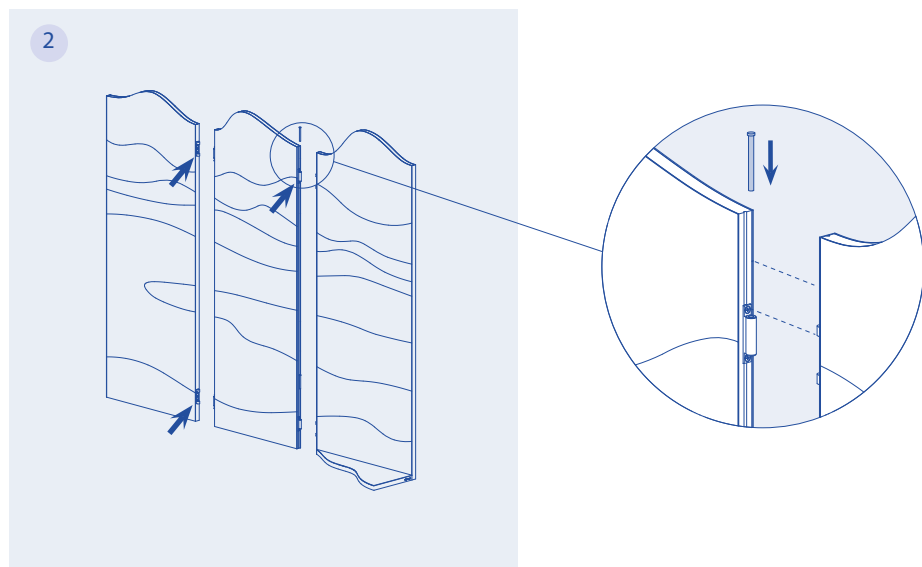

Pins for hinges connections (4 pz.)

Perni per il collegamento delle
cerniere (4 pz.)

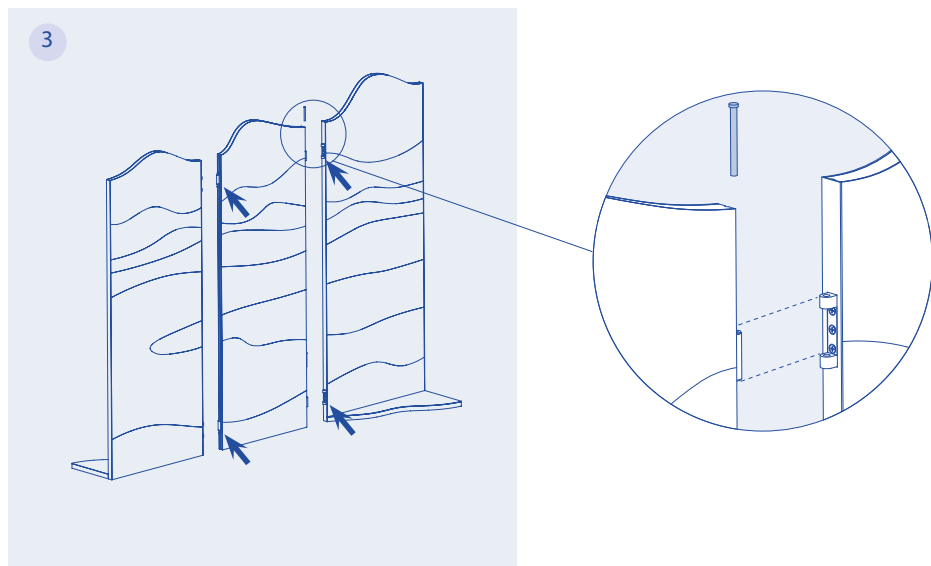

The three panels that form the divider are shipped separately and must be connected using four hinges (fig. 1).

I tre pannelli che compongono il divisorio vengono spediti separatamente e devono essere collegati tra loro utilizzando quattro cerniere (fig. 1).

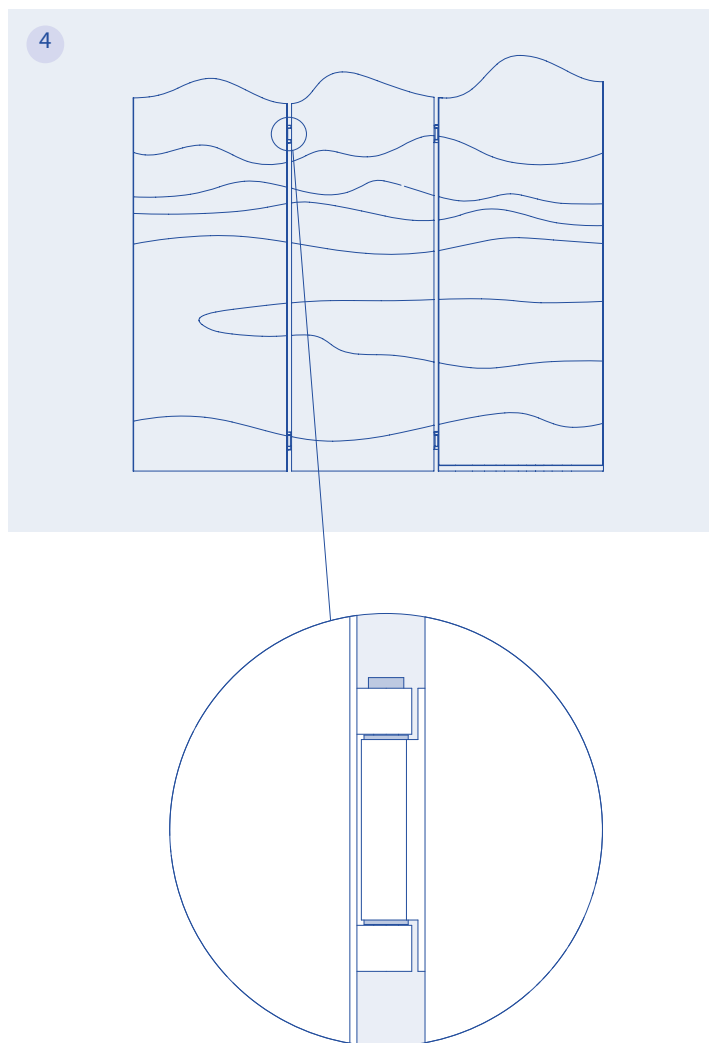

There are four hinges to be attached at the points indicated by the arrows. Bring the panels close together so the pin can be inserted from above, using a rubber mallet if necessary (fig. 2).

Ci sono quattro cerniere da collegare nei punti indicati dalle frecce. Avvicinare i pannelli in modo che il perno possa essere inserito dall'alto, utilizzando un martello di gomma se necessario (fig. 2).

Once the pin is inserted, check that the parts are properly aligned (fig. 3).

Una volta inserito il perno, verificare che le parti siano correttamente allineate (fig. 3).

Once correctly connected (as shown in the detail), the divider can be moved and positioned in the desired location (fig. 4).

Una volta collegato correttamente (come mostrato nel dettaglio), il divisorio può essere spostato e posizionato nella posizione desiderata (fig.4).
